FICTIONAL DOCUMENT — CREATED FOR A HACKATHON DEMO. NOT A REAL TENDER.

Eastern Petrochemical Holding (fictional) — Procurement & Contracts

Request for Proposal: AI-Assisted Contract Review and Clause Extraction

RFP No. EPH-PRC-2027-004 · Issue date: 2026-10-28 · This RFP consists of the main document and Annex B.

Estimated budget	SAR 2,900,000
Contract duration	9 months
Submission deadline	2027-01-10, 12:00 Riyadh time
Bid validity	120 days

1. Background

Eastern Petrochemical Holding manages about 30,000 active and legacy supplier contracts in Arabic and English. Contract owners struggle to find renewal dates, liability caps and termination clauses, which has caused missed renewals and unfavourable automatic extensions.

2. Scope of work

1. Digitize and index the contract repository, including scanned Arabic contracts.
2. Extract key clauses: parties, term, renewal, termination, liability cap, penalties, governing law.
3. Flag risky clauses against the Company's contracting policy and suggest standard wording.
4. Renewal and obligation alerts sent to contract owners.
5. A searchable bilingual dashboard and three months of hypercare support.

3. Hosting and security

The solution must be hosted inside the Kingdom of Saudi Arabia, comply with the NCA Essential Cybersecurity Controls and with the Personal Data Protection Law (PDPL).

4. Evaluation

Technical 60%, financial 40%. Only bidders meeting every qualification requirement in **Annex B** will be evaluated technically.

5. Submission

Bids are submitted electronically before the deadline with a bid bond of 2% of the bid value, valid for 120 days. Late submissions will not be accepted.
